PROFILE

I'm a Front End Web-Developer that brings in-depth knowledge of the latest technology trends to produce clean website design, Experience handling complex HTML, CSS, and REACT coding, design and extensions to meet organization's front-facing internet needs, Detail-oriented collaboration with others to define the project expectations and demand. Currently, I am working on React and I would like to gain more knowledge in this field.

WORK EXPERIENCE

- GoCaby Technology Limited.
  A reliable, convenient and affordable ride-hailing and delivery company in Abuja.
  - Enhanced functionality and appearance of website and repaired functionality issues.
  - Translate customer requirements into technical site concepts for bidding and initial planning purposes.
  - Designed user interface to meet client specifications.
  - Designed highly engaging interactive user interfaces that complied with modern web standard.

- Wuri Technologies Inc.
  A multi currency wallet system that allows you send and receive money globally.
  - Worked with the design team to develop a beautiful, usable and resilient responsive web app.
  - Designed and updated layouts to meet usability and performance requirements.
  - Built the front-end of applications through appealing visual design.
